11th International Colloquium on Paratuberculosis

Søren Saxmose Nielsen

The 11th International Colloquium on Paratuberculosis took place in Sydney 5-10 February. Richard Whittington and his colleagues had put together a very interesting programme for the participants. We were kept busy all the time – not only by scientific presentations, but most notably with a wonderful opportunity to discuss science and non-science with friends and colleagues. We owe the organizing committees and sponsors great thanks for making this meeting a huge success.

Parts of the science are now available via the proceedings at IAP’s website: http://www.paratuberculosis.info/web/index.php?view=article&id=727

So if you missed the meeting completely, missed a presentation because you were busy discussing why paratuberculosis is the most interesting infection globally, missed a presentation because you overslept, then you may be able to do a bit of catching-up by reading the proceedings.

Unfortunately, several members were unable to attend the meeting. You will get a chance to meet friends at the 12th ICP, which will take place in Parma (see below). We hope to see you there.
